Recently Perdue farms Inc, located in Hurlock, Maryland had the opportunity of working with a crew lead by Patrick Moore and 2 other associates. These guys were very hard workers, their time with us was only 7 days, but in the 7 days they were here they worked very hard to complete the job as soon as possible, they were very good to work with, also very willing to do whatever was asked to help us with our bin cleaning. I personally have been in feed milling for 27 years, I have worked with other companies that do bin cleaning, but none of them compare to Mole Master. I can tell by your 3 associates that were here that they are well trained not only in doing their job but also in safety; they were very safe in all aspects of the job they were performing. Over all these guys were very good to work with. I would recommend Mole Master and their crews to anyone needing their services.

Thank you,

Tim Mills

Perdue Farms Inc,

Feed mill manager.
