Luke Berg

Our recent project to clean the 48,000 bushel storage tank and Salt bin went better than expected and under budget. I am happy to report that we had zero safety incidents and everyone left here the same way they arrived.

The crews under the direction of Phil Proctor were punctual and courteous from the beginning to the end. Their attention to Safety, Quality and Service went hand in hand with Perdue's core values of Quality, Service and Reliability (QSR). They did not waste time, abuse equipment or leave equipment unattended. They left the facility in better shape than when they arrived. The crewmen Jonathan Wallace, T.J. Bennett, Chris Harris, Tony Kincaid and "Big John" Lucio went above and beyond to meet or exceed our expectations.

I have been in the Feed and Grain Industry for 26 years and have never worked with a better contract crew than yours. They represent your company with an industry leading QSR. I would and do recommend your company to any group requiring your services.

Thank you again for a successful end to a difficult process.

Sincerely,
Philip N. Sisler
